Use a **STANDARD FORMAT** such as the one given below. Indicate, in two places, exactly where you obtained your information:

- a) **CITATIONS** or bracketed notes right in the text of your essay
- b) **WORKS CITED** list at the end of your essay

Provide citations whenever you use a summary in your **own words** of someone else's ideas, a direct **quotation**, or a **table**, **chart**, or **diagram** taken from someone else's work

Your own independent ideas and those facts that are considered common knowledge are not footnoted. For example, the fact that Columbus discovered America in 1492 is common knowledge and would not require a footnote.

Each bracketed note or citation must **POINT** directly to the entry for this source in the Works Cited list.

- If there is only one work by a particular author, simply give author's last name and the page number.
(Walker 12)
- If a work has two authors, give the last name of each and the page number:
(Moore and Smith 310-14)
- If the Works Cited list contains more than one work by the same author, include the title and the page number in the citation:
(Stevens, Radioactive Waste 299)

Identify the **LOCATION** of the borrowed information as specifically as possible.

- include volume number where relevant:
(Smith 2: 123)
- in literary works give specific information such as act, scene, and line numbers:
(Shakespeare, King Lear II, i, 22)
- omit page numbers for one page articles or works arranged alphabetically, e.g. encyclopedias.
